Where would society be without entertainment? Nowhere, it is where people get their pleasures from, their enjoyment and their release.

Everybody in the world deserves to be entertained. Some people believe that they can do their own entertaining. Not everyone can entertain themselves. People need to watch actors in movies or plays, listen to musicians play music, and see artists paint or draw. Society would be dead without entertainment. Entertainment is what makes people cry when they need to cry, laugh when they need to laugh, and be scared when they need to be scared. For many people entertainment is their only release from this hard world. Entertainment has been around since The Cavemen. Although, entertainment has changed quite drasticly since then, they still needed it to survive. ~~Many authors believe their books are not being read as much now that there are so many movies to choose from. This is very true, however, a lot of people find it easier to see it performed rather than imagine it in their head.~~ Entertainment is not what is causing society to go down the drains, it is acutally saving it in many ways.

Therefore, many people believe entertainment is ruining society. If entertainment is ruining society, it would have been dead a long time ago. There are far more things that are ruining society than entertainment. Entertainment is not harmful to people.
